OBJECTIVE

Software Engineer with experience in building scalable backend systems and high-performance applications using modern full-stack technologies and AI frameworks such as LLMs, RAG, and vector databases. Strong foundation in data structures, algorithms, system design, and distributed systems, focused on delivering efficient and reliable solutions.

EXPERIENCE

•Associate Engineer - OpenText Content Management

OpenText, Hybrid/India

August 2025 - present

- Developed and maintained scalable Retrieval-Augmented Generation (RAG) applications for enterprise search solutions handling large-scale data.
- Improved retrieval accuracy by **30%** by optimizing embeddings, context filtering, and query performance.
- Built a high-performance prompt execution ecosystem enabling dynamic querying over vector databases.
- Optimized system performance and reduced response latency through efficient backend and UI enhancements.

•Intern – Core Intelligence Aviator

OpenText, Hybrid/India

March 2025 – August 2025

- Optimized LLM prompts to improve response clarity, context relevance, and reliability in large-scale enterprise workflows.
- Enforced structured and searchable logging in Spring Boot, improving observability and debugging efficiency.
- Collaborated in Agile teams, contributing to scalable feature development, peer reviews, and SDLC processes.

EDUCATION

• Bachelor of Technology in Computer Science

2021-2025

CVR College of Engineering, Hyderabad

CGPA : 8.93

• Class-XII

2019-2021

Candor Shrine I Senior Secondary School, Hyderabad

Percentage : 95.6

SKILLS

- **Programming Languages:** C/C++, Python, Java, JavaScript
- **Front-end:** HTML/CSS, Bootstrap, Tailwind CSS, ReactJS, React Native
- **Back-end:** NodeJS, ExpressJS, Spring Boot
- **Databases:** MySQL, MongoDB, Vector Databases
- **AI & Tools:** LangChain, n8n, REST APIs, Git, GitHub, CI/CD
- **Concepts:** Data Structures, Algorithms, System Design, Distributed Systems, Scalability, Performance Optimization, SDLC, Agile Development
- **Other Skills:** Problem-Solving, Competitive Programming, Communication

PROJECTS

•LabGear

React-Native, Firebase SDK

Lab Inventory Management System

- Built a centralized lab inventory system using React Native for efficient resource tracking.
- Implemented real-time alerts and automated lab allocation based on requirements.

•Ride Share

ReactJS, NodeJS, MongoDB, Bootstrap

A Carpooling Application

[View Project](#)

- Developed a full-stack ride-sharing platform integrating Google Maps APIs for real-time routing.
- Implemented location-based services including autocomplete and dynamic route optimization.

ACHIEVEMENTS

- **Pupil**, at CodeForces (Max. 1312)

[Profile](#)

- **3 Star**, at CodeChef (Max. 1657)

[Profile](#)

- **Top 8.4%**, in LeetCode

[Profile](#)
